

Rob Warendorf joined Lake Shore Environmental in August 2018 as an Environmental Engineer. Rob is from New Jersey and graduated in 2018 with a B.S. from the University of Delaware. Rob worked as an intern at T & M Associates and decided that he liked environmental consulting. He took the initiative to reach out to LSE and based on LSE's increased work load and Rob's undergraduate coursework and easy going personality, it was a good fit. Rob currently works on environmental assessments, Phase II subsurface investigations, remediation projects and groundwater monitoring projects.
